ENVIRONMENTAL PROTECTION AGENCY

Acid Rain Program: NO_x Compliance Plans

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Status of NO_x Compliance Plans in Final Acid Rain Permits.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is providing notice of the status of NO_x compliance plans in final Acid Rain permits that were issued prior to November 29, 1994, the date on which the U.S. Court of Appeals for the District of Columbia Circuit issued a decision vacating the Acid Rain NO_x regulations contained in part 76. Prior to November 29, 1994, EPA had issued draft NO_x compliance plans for public comment and, after the close of the public comment periods, issued final permits or permit revisions that included approved NO_x compliance plans. Under the plans, units were required to meet the standard NO_x emission limitations or the requirements of NO_x averaging plans, and some units were granted 15-month NO_x compliance extensions. The

emission limitations and compliance plan requirements were set forth in part 76.

On November 29, 1994, the U.S. Court of Appeals for the District of Columbia Circuit determined that, in promulgating part 76, the Agency had exceeded its statutory authority. The Court vacated part 76. Consequently, those NO_x compliance plans that the Agency had approved prior to November 29, 1994 are no longer in effect. The Court decision has no effect on any other provisions of the permits, including the SO₂ compliance plans. The permits containing the NO_x compliance plans are listed below. Upon reissuance of NO_x regulations, EPA will again address the status of these NO_x compliance plans.

EPA notes that there are some NO_x compliance plans that were submitted, but not acted on before November 29, 1994 or were submitted after November 29, 1994. In light of the Court's decision, the Agency has deferred action on any NO_x compliance plans that had not already been acted on by that date.
